KARNARIUM

History

Karnarium started out in 98 with the intention of playing in the vein of old Pungent Stench and old Obituary (they were called Butchered in Disgust at that time). They did one song and then realized that they weren't meant to this kinda thing. Things changed damn quickly, more serious lyrics, better riffing and more advanced drums were in order and thus Karnarium became what they are now. They've had problems with line up since the start but they didn't care, Karnarium's here now to dwell in the Underground!

The two tracks included in this 7" deal about the demoness Lilith and her defeat of the angels sent by god to defeat her, and feature the strongest material ever written by the band!
